

Environmental Policy

Prime Transport Solutions is a manufacturer and supplier of Pneumatic landing legs for truck trailers. Pollution prevention is imperative in preserving our environment and we will strive to continually improve by reducing resources, energy and waste while complying with all applicable legal requirements.

We understand that all companies have an impact on the environment, whether directly themselves or indirectly through supply chain. Through our products we aim to change the behavior of organisations by providing them with the tools to reduce, measure and manage the impact that their organisations have on the environment by reducing their carbon footprint, improving fuel efficiency and minimizing the use of chemicals.
